

QUALITY ASSURANCE

SurgeOn Quality Assurance provides many features to monitor the satisfaction and quality of patient care for your center. All tools are extremely efficient to help you enter, maintain, and report data quickly.

Trusted Experience. Innovative Solutions. Unparalleled Service.

Variance Reporting

- Tracks all variances that occur, including those that do not involve a case or patient
- Routine analysis of these variances helps to determine areas for center or staff improvement
- Tracks the status and completion of all cases
- Data and reports in the Variance module support JCAHO or AAAHC subscribing standards
- Tracking features include categories, subcategories, time, estimated cost, cause and body locations, and staff

Implant/Explant Register

- Tracks all supplies that leave your center with a patient
- Tracks all supplies implanted or explanted from a patient
- Captures serial number, lot number, and vendor name

Patient Survey

- User-developed survey questionnaires
- Option to capture respondent data
- Up-to-the-minute report analysis of patient satisfaction

Surgeon/Staff Credentialing

- Accreditations, license, credential, and privilege information for all staff
- Mass update feature allows one physician's credentials to be copied to another, then edited
- Statistical reporting provides information on outcomes and staff performance
