

# SurgeOn Lite

**SurgeOn** is a comprehensive software system designed solely for ambulatory surgery centers. For nearly 30 years, we have listened to and learned from ASC staff, administrators, consultants, and management companies serving the industry. It is this knowledge and experience that has enabled us to create the first product for surgery centers that conforms to your workflow and processes.

*Trusted Experience. Innovative Solutions. Unparalleled Service.*

We at Experior realize the success of today's ASC hinges on the ability to control costs and maximize the utilization of all resources. To respond to these demands, **SurgeOn Lite** provides a flexible product that keeps pace with the fluctuating needs of both the clinical and business sides of an ASC.

At the same time, we know that providing the finest software to the ASC community is only part of the solution. It is the dedication and knowledge of our staff that will ensure your on-going satisfaction with **SurgeOn Lite**. We have an experienced training team that will work with you through the entire installation process. Our responsive support staff and on-line help have taken customer support to a new level. Our development team will continually strive to add the features that you want and need in a software system. These are all part of what makes **SurgeOn Lite** the ASC system of choice for today's surgery centers.
