

WebChart EHR

POWERED BY MIE

Putting a patient's medical record at your fingertips is not only a convenience for today's healthcare provider, it's a necessity. By automating the medical chart, instant access to a patient's health record becomes a reality.

Many medical treatment errors that occur can be prevented by using an electronic health record. **WebChart EHR** can reduce costs and improve efficiency while improving patient care.

WebChart EHR is an integrated portfolio of Web-based EMR, RIS/PACS and Document Management solutions designed for physician practices and ambulatory surgery centers. The value **WebChart EHR** delivers can be summed up in two words—minimally invasive. Patients have long enjoyed the benefits of minimally invasive procedures, and the Minimally Invasive™ **WebChart EHR** portfolio increases comfort, improves outcomes and accelerates the realization of benefits for medical practices and surgery centers. Implementation is designed to minimize practice upheaval and help your practice realize the maximum return on a WebChart EMR, RIS/PACS or Document Management investment.

Flexible, Convenient, and Efficient: WebChart EHR puts you in control

WebChart EHR helps you manage your medical records by streamlining workflow and putting vital information conveniently at your fingertips whenever and wherever you need it. Scanned data, radiographic images, voice files, and transcribed documents mesh seamlessly using the features described below. The paper chase is over, with **WebChart EHR**, your practice can reduce administrative headaches and focus on patient care.

- Browser or server based
- Medical-document management
- Tasking and workflow automation
- Online dictation and transcription
- e-Sign
- Online DICOM radiographic imaging
- Digital faxing, prescription writing
- Scheduling
- High-speed scanning
- Access control
