

Quality Assurance

ExpertPM Quality Assurance provides many features to monitor the satisfaction and quality of patient care for your center. All tools are extremely efficient to help you enter, maintain, and report data quickly.

Trusted Experience. Innovative Solutions. Unparalleled Service.

Variance Reporting

Tracks all variances and incidents that occur, including those that do not involve a case or patient

- Analysis of variances helps to determine areas for center or staff improvement
- Tracks the status and completion of all incidents
- Data and reports in the Variance module support JCAHO or AAASC subscribing standards
- Tracking features include categories, subcategories, cause, and staff
- Statistical reporting provides information on outcomes and staff performance

Provider Credentialing

- Accreditations, license, credential, and privilege information for all staff
- Mass update feature allows one provider's credentials to be copied to another, then edited

Patient Survey

- User-developed survey questionnaires
- Option to capture respondent data
- Up-to-the-minute report analysis of patient satisfaction
